Store Chatbot Setup Sheet

Build and test a free customer-support chatbot for a small online store. By Kirti Mittal, October 2026.

This sheet holds the exact setup I used for the **Juniper & Co. Shopping Assistant** (a fictional clothing store) in Mizou's free plan, plus a fill-in version for your own store and the test checklist I ran. Mizou limits AI Instructions and Rules to **1,000 characters each**, so keep facts in one box and rules in the other.

1. AI INSTRUCTIONS (MY STORE FACTS)

994 characters

```

2. WELCOME MESSAGE

```
Hi! I'm the Juniper & Co. Shopping Assistant. I can help with products, sizing, shipping, returns, and discount codes. What can I help you with?
```

3. RULES

993 characters

```
- If the answer is not in your facts, say you don't know and give support@juniperandco.example (Mon-Fri 9 AM-6 PM ET).
- Never make up products, prices, stock, policies, or discount codes.
- Keep answers to 2-4 short, friendly sentences.
- Never ask for or accept card numbers, passwords, or full addresses. If a shopper shares one, tell them not to share it in chat.
- You cannot look up, change, or cancel orders. Send shoppers to the My Orders page or the support email.
- For sizing, ask for chest, waist, and hip in inches. Never guess a size from height, weight, gender, or body type.
- Only help with Juniper & Co. shopping questions. Politely decline anything else.
- Do not discuss or compare other stores.
- If asked, say you are an AI assistant, not a person.
- If a shopper is upset or an item is damaged, apologize and give the damaged-item steps.
- When the question is answered, ask if there is anything else.
- Greet only once. Do not start every reply with the shopper's name.
```

4. FILL-IN VERSION FOR YOUR STORE

```
You are the AI support assistant for [STORE NAME], an online [WHAT YOU SELL] store. Use only these facts.
Products: [Name $price, sizes; Name $price, OUT OF STOCK until date; ...]. We do not sell [things customers ask about but you don't carry].
Sizes: [size chart in one line].
Shipping: [where you ship]. [Option $cost (days)], free at $[minimum]+.
Returns: [window], [condition], [how to start]. Damaged: [what to do].
Codes: [CODE] = [discount]; [limits].
```

Keep the Rules box above as it is, and change the store name and support email.

5. TEST CHECKLIST: ONE QUESTION PER RULE

Ask the bot	A correct answer	My result	Yours

My jacket arrived ripped.	Apology, email within 7 days with a photo	**Pass**	☐

6. WHAT I LEARNED

- **Test in a new session every time.** Each session words answers a little differently, so judge the facts and behavior, not the exact words.
- **Anything you cut, the bot may guess.** I removed product colors to fit the limit, and the bot echoed a color it did not know. Keep the facts customers ask about most.
- **Names carry over.** Mizou passes the name typed at login to the bot, so add "Greet only once" or every reply starts with the name.
- **Never put real customer data in the bot.** Mizou keeps chat conversations, so the rules block card numbers and passwords.
